HEAVY DUTY LITHIUM BATTERY FIRE CONTAINMENT BLANKET

Designed for use with Lithium-Ion battery packs

LITHIUM-ION

BATTERY SAFETY RANGE

MODEL:

BFB1/AVD

BFB2/AVD

BFB3/AVD

Features

- Provides safe storage and protection in transit
- Working temperature up to 1000°C
- Fire resistant technical fabrics
- Fire resistant re-enforced multi-layered edge lining
- Fire resistant industrial stitching
- Handling loops on all corners
- Available in three sizes

HEAVY DUTY LITHIUM BATTERY FIRE CONTAINMENT BLANKET

A specialist range of fire blankets developed specifically for Lithium-ion batteries. The blankets are capable of withstanding extremely high temperatures for a prolonged period of time as well as being robust enough to offer protection against potential debris and shrapnel expelled during a battery fire event.

If your organisation produces, stores or transports lithium-ion batteries and associated devices, you need a comprehensive fire safety strategy which incorporates passive and active fire suppression systems. Our Fire Containment Blanket is an important part of passive fire protection.

The Fire Containment Blanket is easy to store and easy to deploy. Available in a variety of sizes as follows:

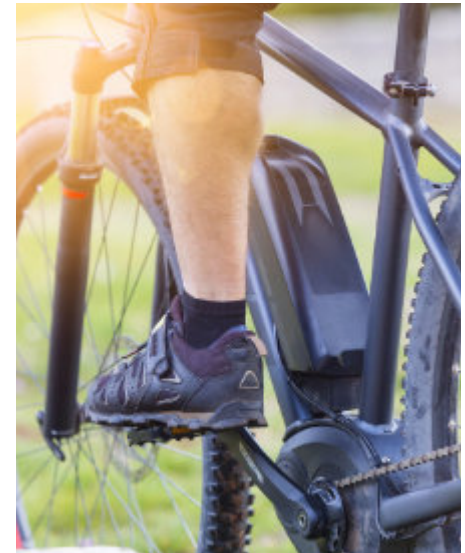

- 2m x 1.8m
- 3.3m x 2.4m
- 9m x 6m

Our range also includes specialist Extinguishers and Fire Resistant Containers. Please contact us for details.

MODEL:
BFB1/AVD
BFB2/AVD
BFB3/AVD

Model Number	BFB1/AVD	BFB2/AVD	BFB3/AVD
Product Code	104-1083	104-1082	104-1084
Dimensions (m)	2 x 1.8	3.3 x 2.4	9 x 6
